## Custom label sizes for the BradyJet J2000 Colour Label Printer

We are expanding our offer of tapes and labels for the *BradyJet J2000 Colour Label Printer* with custom sizes for B-2595 self-adhesive vinyl, B-2569 self-adhesive polyester, B-7425J polypropylene and B-2551 tag material.

### BRADYJET J2000 COLOUR LABEL PRINTER

The BradyJet J2000 is a practical and easy to use **full colour inkjet label printer** that can print reliable signs, facility and laboratory sample labels in high resolution.

It is a peripheral printer system that prints full colour labels and signs between 19 and 100 mm wide.

#### Sort samples by colour

The BradyJet J2000 Colour Label Printer can print any colour on reliable laboratory sample labels. By setting up a colour code, laboratory specialists will be able to recognise sample categories at a glance. With over 16 million colour variations, users may switch colour every day, or use a different colour per application, storage or urgency type depending on the needs of their laboratory.

#### Signs that comply and get noticed

With over 16 million colour variations, the BradyJet J2000 enables customers to print their own, eye-catching safety signs, tags, pipe markers and lean instruction labels to increase workplace safety and efficiency and at the same time comply with any regulatory colour code. Quality images and pictures can be added to any sign thanks to the printer's high, photo-quality printing resolution of 4800 dpi.

#### Automatic Label Setup

The BradyJet J2000 reads critical information from the supplies to enable automatic set-up so you can start printing immediately. No calibration, no print speed/burn temperature trial labels, no scrolling through screens to select a label and no wasted time setting up label dimensions.

## Swift Material Changeovers

“Click-in” ink cartridges and easy label material loading mean no complicated threading, assembling spindles, sensor adjustment or calibration steps

## CUSTOM LABEL SIZES FEATURES & BENEFITS

- **Get the exact label sizes your customers need!**
- Makes the printer more versatile by working with more applications that fit the exact need of the user – ideal for lab sample triage, lab urgency sample protocol labelling, padlock photo's, inventory/bin labels, small container labels (including CLP/GHS labels), bar code labels and more.
- Available in either continuous or die-cut formats.

## LABEL SPECIFICATIONS

Label guidelines for BradyJet J2000 custom labels:

- B-7425J, B-2595, B-2569 or B-2551 materials
- Label width:
  - Min – 19,05mm (38,1mm for B-2551)
  - Max – 101,6mm (107,95 mm for B-2551)
- Label height/length:
  - Min – 6,35mm (50,8 mm for B-2551)
  - Max – 406,4 mm (355,6 mm for B-2551)
- Min order quantity – 3 rolls (each roll is about 30,5 m in length – Customer Service can advise how many labels per roll when a custom size die-cut label is requested).
- 1 label across (except B-7425J for vials rectangle + circular label set ups)
- No preprinted elements

*Note: The label roll will include an RFID smart cell as well as simple instructions on how to upload the custom label size in Brady Workstation for label design the first time that size is used.*

**Contact your Brady Customer Service representative for a quotation.**
