

Codesoft 2025 version and Pricing update

- Codesoft 2025 version is launched
- Changes in pricing and Codesoft product offering
- Legacy Codesoft versions are not compatible with Windows 11

New Codesoft version released

Codesoft 2025 version is now available. A highlight of the new features and improvements coming with Codesoft 2025 as follows:

- Support for new GS1 Digital Link standard in GS1 Wizard
- Compatibility with Windows Server 2025
- Updated licensing (a quota and add-on) for PDF and electronic output operations
- Expanded barcode support
- Newly added native printer drivers and ready-to-use label templates

Codesoft pricing update and changes in product offering

With the Codesoft 2025 release, the price list of Codesoft products is also updated. While price increase is around **9%** for new single-user licenses (both perpetual and subscription), the increase is variable for subscription renewals, SMA renewals and new Network licenses. New prices are effective **as of October 27, 2025**.

There are also some changes in the Codesoft product offering:

- Perpetual licenses with **3 year SMA** (Software Maintenance Agreement) are phased out. When ordering a new license with 1 year SMA, SMA renewals can also be purchased to extend SMA coverage.
- **Codesoft Lite** and **Codesoft Pro 1 THT** editions are phased out. Renewals for existing licenses are possible based on Codesoft Pro 3 THT equivalent price.
- **Codesoft Runtime perpetual** licenses are phased out. Codesoft Runtime will only be available as a subscription license.
- Codesoft ECE versions for Eastern & Central Europe countries are phased out.

Codesoft upgrade options for Windows 11 transition

Many organisations are upgrading from Windows 10 to Windows 11 as **Microsoft's support for Windows 10 ends on October 14th 2025**. Codesoft versions older than Codesoft 2022 aren't compatible with Windows 11. Customers using older versions need to upgrade to the latest version to use Codesoft on Windows 11.

Customers with subscription licenses or perpetual licenses that include a Software Maintenance Agreement (SMA) can upgrade to Codesoft 2025 at no extra cost. An email should be sent to tseurope@bradycorp.com with the license serial number and the email address where the updated license should be sent.

Customers who have a perpetual license without an SMA will need to purchase a new Codesoft 2025 license.

Please contact your respective customers to discuss upgrading to the latest Codesoft version.
